

Intelligence for boards and portfolios

Building great boards in a time of unprecedented geopolitical uncertainty and technological change takes a different kind of board operation, and that is exactly what BoardLens is built for. Better meetings, better outcomes, better relationships: far more effective, and fully compliant.

BoardLens works best as a shared working platform, built for the board and management to work together more effectively and drive better outcomes.

What it means for your board and management

- ✓ **More effective meetings:** time goes to decisions, not bringing everyone up to speed.
- ✓ **Better decisions, fewer surprises:** risks surface early, while the board can still act on them.
- ✓ **More gets done:** higher board output, with less back and forth between cycles.
- ✓ **Stronger board and management relationships:** a shared, well-prepared basis for real strategic dialogue.
- ✓ **Less resource-intensive meetings:** a lighter preparation load for management and directors alike.

Built for enterprise security

BoardLens gives your directors a secure, sanctioned way to use AI on your board materials, instead of leaving you to wonder what tool they'll turn to otherwise. You stay in control of your data:

- ✓ **Your data is never used to train any AI model:** contractual, and enforced cryptographically.
- ✓ **Everything is encrypted,** with EU or US data residency, your choice.
- ✓ **Every analysis shows its work:** the evidence and citations behind each point, exportable whenever you need them.
- ✓ **Aligned with SOC 2, GDPR/CCPA and the operational-resilience regimes across the EU, US and UK (DORA, FFIEC, FCA/PRA):** and glad to work with your IT or compliance team.

"At Tallence, both our executives and board members use BoardLens together. It's become our shared platform for stronger strategic conversations and better-prepared board meetings."

Wolf-ingomar Faecks

Chairman of the Supervisory Board, Tallence AG

Adopting BoardLens as a shared platform is a decision a growing number of boards are making together. If that is a conversation your board would value, we would welcome it, and we are glad to work directly with your IT, security or compliance team on any review.
